Thank you for downloading this the 2016 extract of the catalogue and price list. Please note there has been a price increase over the 2013 catalogue, due to the ever increasing cost of high grade machine brass, thank you for your understanding.

This document has been scanned at a resolution that should ensure good quality print outs should you wish a hard copy.

Please view this document at 100% zoom to see the tools at full size.

**Ordering:** When ordering wheels or hand tools please write the numbers as shown. The suffix letter is the price code, the prefix HT stands for hand tools, DW to decorative wheels and F to fillets. If ordering pallets from wheel designs add a letter P i.e. PDW = decorative pallets.

When ordering type we need to know the type style, point size and combination required. When making up existing fonts please send a sample E or Z to ensure accurate alignment and weight of face. Please remember when ordering pallets or gouge sets that the line thickness will be supplied as 1 ½ point unless otherwise requested.

**Delivery:** Because we have such a large range of tools and type styles it is not practical to carry a great deal of stock. For this reason most items are made to order, they do however try to complete orders within 28 days of receipt. This may be slightly longer during busy periods. If tools are needed more urgently please tell us when ordering, and we will do our best to meet any deadlines.

Inland deliveries are normally sent by Parcel Force Standard service, urgent orders by registered post or Parcel Force 24 (Next day). Large orders may be sent by carrier service. Postage is charged at cost and will be calculated when ordering.

Overseas deliveries will be sent by the most economical insured service. This will be either Royal Mail Airsure or Swiftair. Parcel Force Euro to Europe or Parcel Force International Scheduled to the rest of the world.

Payment: We accept payment by UK cheque, bank transfer or PayPal. There is a 4% surcharge if paying via PayPal.

Cheques from overseas customers must be drawn on a UK bank in pounds sterling, otherwise a bank transaction fee will be charged.

Note:- VAT is chargeable on all inland orders and non VAT registered EC customers. VAT registered EC customers may supply us with their VAT number for VAT exemption.

**Please contact us by email to arrange your order. Richard Norman [edenworkshops@orange.fr](mailto:edenworkshops@orange.fr)**

# TYPEHOLDERS

1.

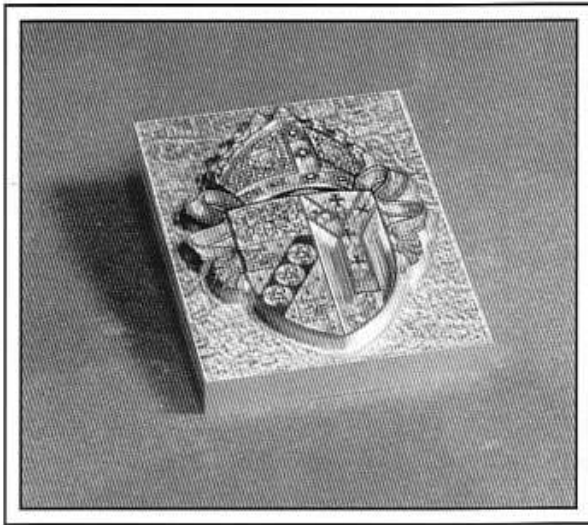

Standard spring typeholders are supplied in 3 sizes 2, 3 and 4 inch and will accept type from 8pt to 36pt. They are cast from gun metal and machined square inside. The steel backplate is bevelled to a fine edge to aid sighting.

Super rapid typeholders are self centring and accept type from 10pt to 36pt in 4 inch length only. The two jaws are centred when the right hand screw is turned to make side spacing unnecessary.

Continental style typeholders are light weight and similar in use to a flat pallet, suitable for type up to 18pt. They are supplied with three various sized spacers and will accept point sizes from 6pt on 8pt body up to 18pt.

# BRASS DIES

Brass dies are manufactured by the same process as our handtools and type, the resulting print being clear and sharp on the softest of leathers. A selection of dies (reduced in size) which we have supplied are shown below. Our handtool patterns can also be produced as dies if required, as can family crests, logos or any custom designs. Quotations will be given on receipt of artworks.

# MINIATURE BOOK TOOLS

CAN BE SUPPLIED AS COMPLETE SET OR A COMBINATION OF SMALLER SETS

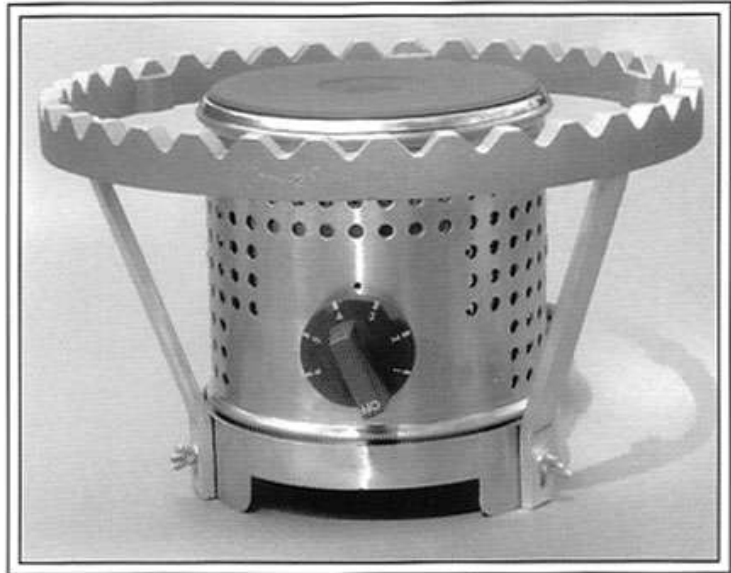

- SET 1 - ALL TOOLS SHOWN + ONE FONT OF TYPE + QUADS & SPACERS
- SET 2 - ONE FONT OF TYPE + TYPEHOLDER + QUADS & SPACERS
- SET 3 - CHOICE OF 3 PALLETS + GOUGE/PALLET SET + A OR B POLISHER
- SET 4 - CHOICE OF 11 HANDTOOLS    SET 5 - CHOICE OF 7 HANDTOOLS

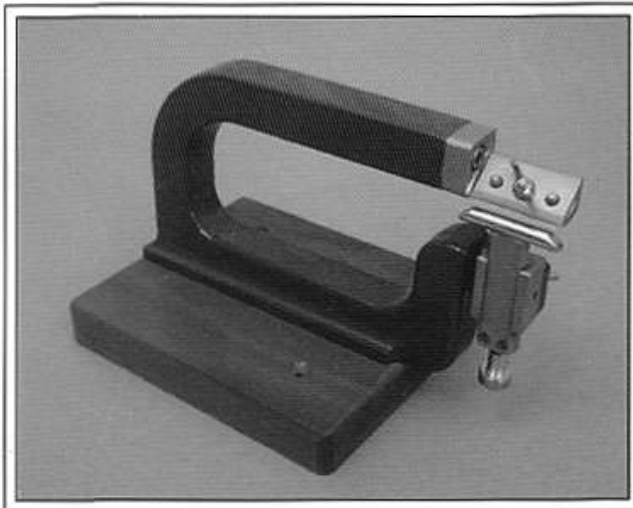

Single Type Holder

## ELECTRIC FINISHING STOVE

Our traditional finishing stove is made from hardwearing stainless steel with three aluminium supports for the cast aluminium castellated ring. The unit is a thermostatically controlled catering stove which is very hard wearing and designed for continuous use over long periods. 1.5kw 230V AC 50Hz

## LEATHER PARING MACHINE

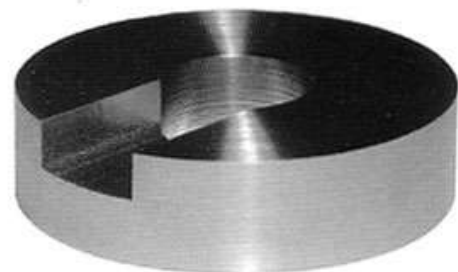

Our leather paring machine is based on a tried and tested design and is simple to set up and operate. The leather is pulled between the anvil and fixed blade. By raising the anvil, thin cuts can be taken until the required thickness is achieved. It is an invaluable tool for quickly preparing inlays, onlays, labels and any thin leather pieces for repairs or half and quarter bindings. The machine has a large throat area to accommodate the pared leather when preparing larger pieces for full leather bindings. The anvil can also be adjusted to produce a feathered edge if required.

## BRASS ROLL REST

(Shown in use above)

A solid brass ring used to rest decorative wheels and fillets on the finishing stove, enabling a more even heat distribution.
