Semi Automatic Case Making Machinery.
Consisting of Cold gluing machine.
Manual edge turner.
Alignment table.

Long established, simple, reliable introduction to short run case making. Equipment in use around the world. Made by Sumbel.

Cold Gluing Machines

Model HEROLD

Gluer applies cold glue or hot animal glue onto covers. Features excellent glue control and variable speed. 220/230 V. 50/60 Hz.

Working sizes: 500, 650, 800, 1000, 1200 mm

Photo shows optional reversing fingers to present covers glued side up.

Edge turner

Manual edge turner. Turns the edges of the book forming a neat turn in. Animal glue requires 1 second compression time. Cold water based adhesive requires 2-3 seconds compression time.

Deals with edges up to 70cm x 35cm

Alignment table

The Alignment Table features a tiltable table top, vacuum suction, adjustable spine width, three point alignment system and a center light.

For covers up to 70 cm x 35 cm

Spine width 6.25mm - 28.75 mm

220/230 V. 50/60 Hz.
