

Rotary Pressing Machine Mod. REGENT

Email Richard at edenworkshops@orange.fr

Mod. REGENT 500

Motordrive : Motor for 230 volts AC 50 cy 1 ph, other currents/voltages on request.
Variable speed control.

Working Sizes	Weights		Dimensions	
	Net	Gross	Machine	Case
500mm	50 kos	70 kos	80 x 45 cms	90 x 50 x 50 cms
650mm	65 kos	90 kos	95 x 45 cms	105 x 50 x 50 cms
800mm	80 kos	100 kos	110 x 45 cms	120 x 50 x 50 cms
1150mm	95 kos	115 kos	120 x 45 cms	130 x 50 x 50 cms

This machine is suitable for all laminating operations. It allows to press, smooth and laminate sheets of paper, cardboard or similar materials which are glued and removes the wrinkles and air bubbles.

Simply feed the glued combination into the Rotary Pressing Machine. Upper rubber roller and lower metal roller can be easily adjusted to accommodate combinations up to 25 mm thick. The pressure can be adjusted independently of the material thickness.

Long lived, easy to use, and virtually maintenance-free. The rollers and gears are completely guarded
